The new high-tech product from Penkert with the high level of comfort for firemen.

Best wearing comfort, secure contact heat protection, minimal shrinkage, without hardening of the material, waterproof and breathable.

ELK DEFENDER

The new protective elk leather glove for firemen.

>> available with extra long leather guntlet and deflatable Velcro closure
article: ELK DEFENDER (ST)

>> quality materials ensure a high level of tactility

>> more flexibility and fatigue-proof working because of the unique manufacturing in the knuckle areas

The new high-tech product from Penkert: ideally suited for heavy-duty fire service work. The **ELK DEFENDER**, which in terms of safety, reliability and comfort takes some beating, combines the tactile feel of a leather glove, which for technical assistance is of key importance, with the outstanding properties of textile fire gloves for firemen - namely, minimal shrinkage without a hardening of the materials that are used.

The special flexibility of elk leather, as well as the unique manufacturing ensure fatigue-proof working and a high level of tactility. The version **ELK DEFENDER (ST)** with its extra long leather guntlet ensures a generous opening width of the guntlet and allows the user to put the gloves on over a work jacket without any problems.

NEW: Certified machine washability.

EN 659 tested after 25 Washes. Impregnation recommended after each fifth wash. Impregnating agents available from us.

ELK LEATHER

KEVLAR®/ProtexM®, MINERAL-FASER, Nomex®, Porelle®

>> porelle® insert as a barrier to moisture

FACTS
