www.penkert.com

The new high tech handwear from Penkert is ideal for heavy duty fire brigade operations.

Secure protection against contact heat, minimal shrinkage, no hardening of the material, water-resistant and breathable.

FIREDEVIL PREMIUM

The protective glove for firemen.

>> with 3M reflective stripes

>> deflectable Velcro closure in the wrist area as well as on the opening of the gauntlet

>> gathered padding in the finger, thumb and knuckle areas

The new high-tech product from Penkert: ideally suited for heavy-duty fire service work. The **FIREDEVIL PREMIUM**, which in terms of safety and reliability takes some beating, combines the tactile feel of a leather glove, which for technical assistance is of key importance, with the outstanding properties of textile fire gloves for firemen - namely, minimal shrinkage without a hardening of the materials that are used.

Gathered padding in the thumb, finger and knuckle areas provides an air cushion which insulates well against radiant heat. A generous opening width of the gauntlet allows the user to put the gloves on over a work jacket without any problems.

Comfortable:

as a consequence of the anatomical, individual fit.

Secure:

as a consequence of the gauntlet opening as well as the deflectable Velcro closure.

Economic:

due to the glove's good cleaning characteristics and longevity.
