

IRONGRIP

Textile work (protective) gloves

August Penkert
Technische Leder- und
Kunststoffherzeugnisse

The **IRONGRIP** is especially characterised by slide-resistant finger protection, very robust Clarino material in the palm area as well as an aid to putting the gloves on. Anatomically arranged gel padding cushions against vibrations and forms of impact. In addition, the 'hand-arm syndrome' is prevented from occurring because the pressure on the ulnar nerve canal is reduced in the wrist.

Possible Article combinations (BASIC, PROTECTOR, IRON GRIP)

Technical description

Article no: S-1717

Protective gloves

palm:

- >> Clarino (60% nylon / 40% polyurethane)
- >> the fingertips and hand surfaces are strengthened with Rubbertec trimming (70% PVC / 30% polyester)
