

MEC HEALTH

Protective gloves which have been tested for hazardous materials in accordance with EN 388:2003

August Penkert
Technische Leder- und
Kunststoffherzeugnisse

The new MEC WORK and MEC HEALTH (hazardous material-tested) protective gloves for everyday use from August Penkert GmbH have been approved to feature the 'SG' (hazardous material-tested) logo.

The gloves, which have been specifically designed for daily operations involving mechanical hazards in accordance with EN 388, provide an excellent secure grip as well as room for the fingers to move about. Apart from providing the wearer with a high level of comfort, the gloves protect from abrasion, cuts, puncturing and as well as this, allow steam to pass through. The **MEC WORK** and **MEC HEALTH** (protective) gloves are especially suited to those with an allergy as well as health conscious users. The fact that the **MEC HEALTH** and **MEC HEALTH** gloves are free from hazardous materials and are of a high quality standard has been attested by TÜV Rheinland. As one of the best gloves in their class, they have been approved to feature the 'SG' (hazardous material-tested) logo.
